
Subject: Will Pay for demonstrable Lxadmin/hyperVM vulnerabilities

Lxadmin/hyperVM has become popular enough that people are SPECIFICALLY targeting these softwares now, and so we are now redoubling our focus on security.

If anybody knows about any vulnerability in hyperVM or lxadmin, please contact lxinfo at [lxlabs.com](mailto:lxinfo@lxlabs.com), and we can negotiate a payment if you can demonstrate it clearly.

Of course, after we fix the bug and update the softwares, we will absolutely disclose it publicly too, since we believe in 100% openness, but we need to know about vulnerabilities before it can impact our clients.

Thanks.

Oh the irony of this thread.

Maybe LxLabs will show up again and get a very wry smile out of this too...

pace

I'm wondering where LxLabs really are. Hosting companies are losing thousands on this (luckily, there's been no verifiable damage to my nodes).

What happened to being "honest and proactive"

I may need a bit more to go on than "hmm".

If you have a question, just ask.
