You need to edit the /etc/php.ini file and look for max_upload_size

man it will not change ?

i have changed to this

Max Execution Time = 300

Max Input Time = 300

Memory Limit = 600M

Post Max Size = 600M

Upload File Max Size = 100M

maby it is using php on centos ? how can i change that ? or what do you think

Did you restart lxadmin?

How about modifying the max_upload_size in the /usr/local/lxlabs/ext/php/etc/php.ini file. Then restart LxAdmin.

at ssh use this command

Quote:# mysql -uusername -ppassword -hlocalhost yournamedatabase < /folder/your-backup-database.sql

---
